

Work Experience

Our work experience programme covers a range of different topics including;

- Understanding the importance of health and safety in the workplace
- Knowing how to present ourselves
- Work experience is undertaken in years 12 and 13 and includes:
- Identifying personal skills and qualities needed for the workplace
- Understanding the importance of personal care and dress for the workplace
- Researching different work opportunities and what the job entails
- Understanding the importance of health and safety in the workplace and knowing what to do in an emergency .
- Placement visits
- Work experience placement

Prior to a work placement learners will experience job shadowing within school. All learners will discuss their options with the staff and agree a suitable work experience placement. Placement takes place one day a week for either 5 weeks or 10 weeks. We find a placement that individual learners are interested in and identify the most appropriate form of support for the learners. This gives a personal and tailored approach to work experience which means that each learner can fully maximise their experience to their individual needs.
